The importance of IoT is getting greater attention as IoT connectivity world is expanding from a different range of traditional devices to many different 'things' that includes the embedded technology systems. How these devices or things can communicate and communicate in a secure way, and how it can be controlled and operated in optimal or semi-optimal way, is attracting many researchers to develop techniques and methods and opened many research tracks.

Given the different and the new research tracks that are getting more attention in this field, we have developed this special track to be a forum for discussion of any research that are conducted in the area of IoT.

This special track is designed to cover any recent trends and technologies related to IoT including but not limited to

- IoT security
- IoT Data Protocols
- Sensors and Device Management
- Multi-layer Frameworks
- IoT Infrastructure
- IoT and Cloud computing
- IoT Architecture
- Addressing and naming in IoT
