Since its inception, the Semantic Web has been proven to be the standard for publishing structured information. Billions of facts pertaining to a multitude of domains are now available under the RDF framework and the Linked Open Data Cloud has accomplished a continuous and solid growth. The RDF framework has been shown to be the most adopted format for publishing knowledge graphs.

In this track, **we invite submissions** from a broad range of topics involved in the process of publishing and consuming RDF knowledge graphs, including:

- Linked Data Management
- Ontology Mapping, Merging and Alignment
- Structured Machine Learning
- Knowledge Graph Embedding
- Data Quality
- Semantic Search
- Question Answering
- Ranking and Summarization
