The new ASMCSI track on Applications of Social Media in Communications, Security and Informatics welcomes submissions that make significant and novel contributions in the area of social media analytics. Specifically, ASMCSI track invites papers that aim on providing effective solutions and actionable insights on evaluation of social media data for developing a wide variety of applications. Social Media Analytics is a broad area that covers a wide range of unique applications. ASMCSI track focuses on the use of social media in the field of Network Communications, Network Security, and Security Informatics.

The special track ASMCSI welcomes the articles making significant contributions in development, use, and evaluation of advanced information technologies (including methodologies, models and algorithms, systems, and tools) for relevant applications. The applications include privacy, security, cybercrime, politics, location tracking, resource allocation, and scheduling. Submissions are encouraged from all the areas.

The issue should relate to any of the following topics, but not limited to:

Social Network Analysis in Network Communication:
- Unique communication paradigm
